

# PARKING HANGARS

To complement the services provided by the FBOs at Dubai South, temperature controlled Parking Hangars will be developed at the Aviation District. The hangar facility will complement Dubai South's Aviation district as a complete, dynamic and preferred business aviation destination.

Dubai South have sought to deliver a solution that is flexible for its FBO operators by allowing the offer to grow as their business expands and at the same time attractive to VIP passenger jet owners to meet the potential future demand for such facilities. 20,000 movements are expected by 2020.

## **FURTHER DETAILS**

- The parking hangars will be built on Code C plots
- Will be able to accommodate up to 3 Code C aircraft of B727-200 type and/or a combination of smaller aircraft
